EXPERIENCE

Lincode Labs

Associate Software Developer

Bengaluru, India
Apr 2026 – Aug 2026

- Developed and maintained 8+ backend REST APIs using Python, FastAPI, and Flask, implementing application workflows and business logic with minimal production defects.
- Integrated backend services with MongoDB, PostgreSQL, and Redis for data storage and retrieval, improving average API response time.
- Implemented request validation, authentication, and structured error handling across 8+ API endpoints.
- Debugged and resolved 15+ backend defects by analyzing application logs, API behavior, and database operations.
- Built and ran backend services in Docker on Linux-based environments, reducing local environment setup time by 15%.
- Analyzed requirements and modified existing backend functionality, validating changes through testing to ensure reliable API behavior.

Tata Consultancy Services (TCS)

System Engineer

Bengaluru, India
Feb 2024 – Mar 2026

- Developed and maintained backend components using Python and SQL, supporting 5+ core business workflows in production.
- Implemented application changes against functional requirements, following structured software development and code review practices.
- Investigated and resolved 25+ production defects through root-cause analysis of application logs, code, and database behavior.
- Designed and executed test cases to validate functional changes, reducing post-release defects by 20% across 2 release cycles.
- Collaborated with a 6-member engineering team throughout development, debugging, testing, and delivery of software changes.

PROJECTS

Enterprise E2E Test Automation Framework | Python, Test Automation [Repository Link](#)

- Built a modular end-to-end test automation framework with reusable components, reducing test script duplication and easing long-term maintenance.
- Automated execution across 30+ test scenarios for web application flows, improving regression test coverage and cutting manual test effort.

FastAPI + MongoDB + Docker Backend Application | Python, FastAPI, MongoDB, Docker [Repository Link](#)

- Designed and containerized a backend application exposing 6+ REST endpoints for CRUD operations backed by MongoDB.
- Implemented request validation and structured error handling for invalid-request during testing.

FastAPI JWT Authentication API | Python, FastAPI, JWT, REST APIs [Repository Link](#)

- Built a REST API with JWT-based authentication and authorization, securing 5+ protected endpoints.
- Implemented token-validation middleware to enforce authorization across protected routes.

EDUCATION

APS College of Engineering

Bachelor of Engineering – Computer Science and Engineering, CGPA: 8.1

Bengaluru, Karnataka
Aug 2019 – May 2023

TECHNICAL SKILLS

Languages: Python, SQL

Frontend Development: HTML, CSS, JavaScript

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, System Design

Backend Development: FastAPI, Flask, REST APIs, JWT

Databases: MongoDB, PostgreSQL, Redis

Software Engineering: Software Testing, Test Automation, Debugging, API Development

Tools & Platforms: Git, GitHub, Docker, Linux, Postman, AWS (Basics)
